

**I want immediate business intelligence reporting.**

### **PowerOLAP®**

PowerOLAP® is a powerful, affordable business intelligence solution that provides the features to give you what you want. It is a flexible analysis, reporting and business modeling software that will provide immediate figures to help with projections. Start making tax, planning and business decisions quickly and effectively, not just to compete in today's real-time world—but to succeed in tomorrow's.

### **Immediacy.**

PowerOLAP offers ad-hoc reporting from any tax department software for both modeling and analytics. Access the information you need to make important decisions with the best possible information. Reach your up-to-the-moment data dynamically with Excel® or with your browser, using PowerOLAP's maximum capabilities to model data according to your changing business needs.

### **Intelligence.**

PowerOLAP combines advanced analytical and reporting capabilities with enhanced spreadsheet productivity, adding to its status as a cost-effective tool that can be easily managed and used by tax departments. PowerOLAP leverages the tools and expertise your department already possesses to increase operating cash flow, manage risk and reduce errors while optimizing tax and financial operational decisions.

### **Simplicity.**

PowerOLAP is a straightforward data collection tool with an Excel front end. It provides dynamic online access to multiple sources utilizing the most common tools at each user's disposal. Data flows directly through PowerOLAP, meaning that users continue to report using Excel while also combining all spreadsheet capabilities—such as calculation, formatting and graphing—in the solution.

## Best-Case Planning

PowerOLAP is an invaluable tool for modeling, budgeting and forecasting. You can now build models and perform “what if” analyses on a solid foundation of current and historic information. PowerOLAP gives authorized staff real-time interactive access to all historical and current book and tax data, transactional level detail, assets, liabilities, expenses and cash flow data.

## Dynamic Data Integration

Reach data from various transactional data sources, enabling you to model, forecast, analyze and report using up-to-the-instant data. Your accounting and tax teams will find tremendous value in leveraging PowerOLAP for:

- Provision—FAS 109 and FIN 48 calculations and tracking.
- Adjustment automation and drill down.
- Property, payroll and receipt analysis.
- International and state tax planning.
- Foreign tax credit optimization.
- Global data collection.

## Fast and Flexible

Create multidimensional views of the different facets of your business (entities, source of earnings, sales, earnings and profits, trial balances, accounts, jurisdictions, periods, actual vs. budget, statutory, tax and GAAP) with drag and drop, double-click speed. See instantaneous results for your analyses, queries and “what if” scenarios as they reflect changing business conditions.

## Dynamic Excel or Web Access

With the click of a button, create a spreadsheet or dynamic Web view from PowerOLAP and work with the tools you know best. From Excel, it's simple to change a view and perform higher-level analytical functions. Spreadsheets with dynamic access are sharable throughout the enterprise or via the internet. Your spreadsheet or web view will update automatically as the underlying data or structure changes. This is true end-user empowerment.

## Generate Real Results

Get all the information you need to effectively operate your business, at a price you can afford:

- Advanced analysis, including “what if” and on-the-fly capabilities, using multidimensional data-modeling technology.
- Powerful data access and ad-hoc reporting via Excel or the Web.
- Up-to-the-instant data from critical organizational databases.
- Secure enterprise-wide sharing.
