

Red Moon Solutions®, True Partners Consulting and Intelysys, Inc. Present  
The Next Generation of Global Tax Management  
Red Moon Solutions Provides Business Intelligence Solution to Help Mitigate Tax Risks

**Sarasota, FL, December 9, 2008** – Red Moon Solutions, a premier provider of specialty tax software solutions along with True Partners Consulting and Intelysys, Inc. presented [The Next Generation of Global Tax Management](#) at the Chicago Tax Club’s 55<sup>th</sup> Annual Fall Seminar. The presentation showcased how one US based manufacturing company evaluated their total tax risk and has taken steps to mitigate these risks. Essentially, it illustrated how the solution trio helped align this publicly traded company’s tax IT strategy with a holistic vision of its tax function to incorporate people, processes and technology.

Tax executives are faced with the ever-complex global tax environment and are forced to look at the total risk of their tax function (Total Tax Function Risk is defined by True Partners Consulting as the sum of finance risk, operational risk, tax technical risk in relation to its integration risk). It is the proper alignment of people, process and technology within the tax function, effectively integrated with all business processes, which will allow an organization to achieve the next generation of global tax management. Moreover, by looking at tax risk in a holistic manner, incorporating all components driving risk for a tax function, the next level of tax risk management can be achieved.

The solution trio of RMS, TPC and Intelysys has achieved success in providing a holistic solution including technology automation, task risk management and advisory, along with implementation and reporting. Specifically, their solution consisted of reengineering the tax function accordingly:

- Creation of accounting data store to capture all accounting data monthly
- Creation tax data store to capture all tax calculations and results
- Implementation of a tax portal
- Use of a single tax calendar
- Implementation of OLAP Analytics and Reports

“We are thrilled to be a part of the next generation of tax management solution created in concert with True Partners Consulting and Intelysys, Inc.,” comments Kelley Lear, Managing Director, Red Moon Solutions. “Our portion of the solution, the implementation of OLAP analytics and reports, is accomplished using [PowerOLAP®](#), a powerful, yet affordable, business intelligence tool that provides fast, flexible analysis, reporting and business modeling. [Tax professionals love PowerOLAP](#) because it leverages the [tools](#) and expertise they already possess.”

To learn more about how to evaluate total tax risk and how to take steps to mitigate them, view the presentation (will have hyperlink to ppt) or contact [Kelley Lear](#) at 941.379.7108.
