

## **Fixed Assets Manager Proactive Communication for Release 2007.02**

**Program: Fixed Assets Manager**

**Release: 2007.02**

**Date: April 23, 2008**

### **Issue:**

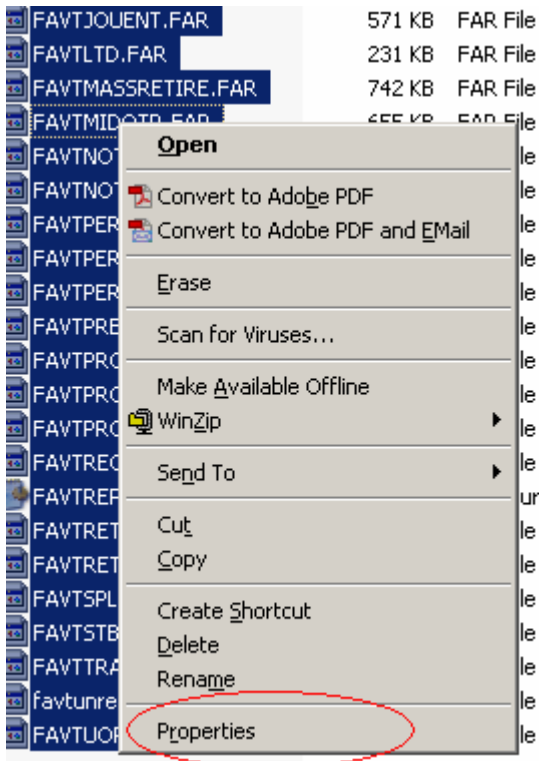

The 2007.02 installation did not update the files used to generate the Fixed Assets Manager reports.

This is a display issue on the reports and does not affect the Fixed Assets Manager data. However, this could cause some reports, such as on the Depreciation report, to display incorrect amounts in the Summary section of the report.

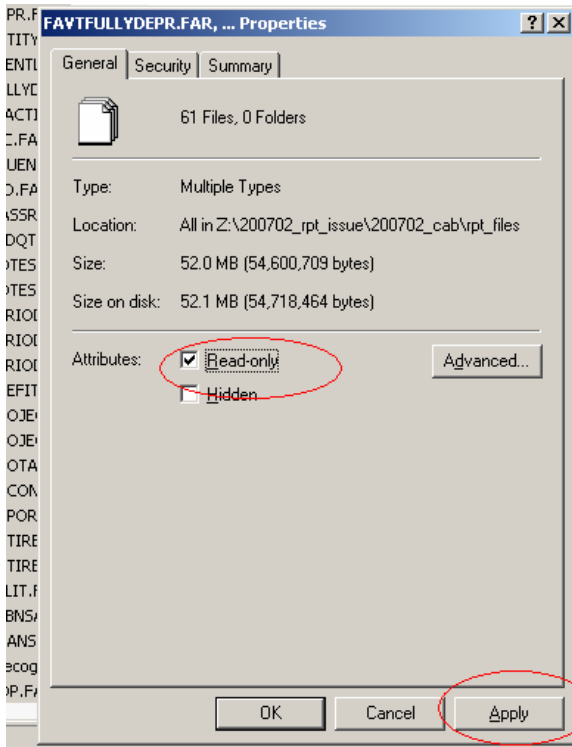

### **Resolution:**

Updated report files need to be copied to the FAREPORTS folder where Fixed Assets Manager is installed. After saving the **200702\_reports.exe** to your desktop, complete the following steps:

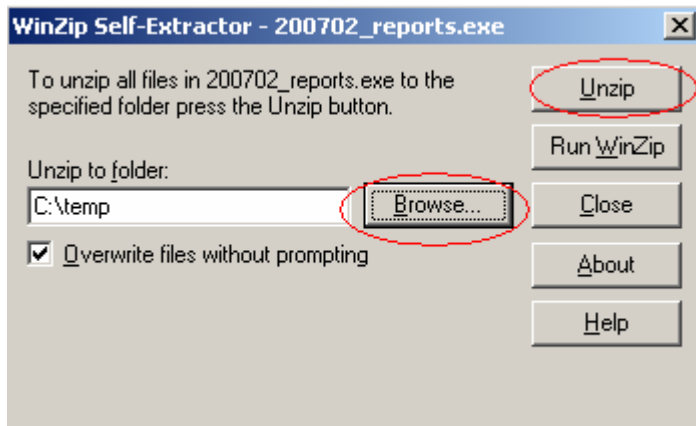

1. In the location where Fixed Assets Manager is installed, find the folder called FAREPORT.
2. In the FAREPORT folder, proceed as follows:
  - a. Select/Highlight all the files in the folder.
  - b. Right mouse click to activate the popup menu.
  - c. From the popup menu select Properties.

3. On the Properties dialog find the “Attributes: Read-only” check box.
  - a. Uncheck the box.
  - b. Press the “Apply” button.

4. Find the 200702\_reports.exe file that you detached.
5. Double click on the file.
6. See the WinZip Self-Extractor dialog box.

7. Point to the location where the Fixed Assets Manager report files are installed. It will be in a folder called FAREPORT. (examples: C:\Program Files\Redmoon\FAREPORT or G:\Redmoon\FAREPORT)
8. Press the “Unzip” button.
9. The completed unzip operation will look like this:
